Mrugesh Thesiya

+91-7567164025 **thesiyamrugesh@gmail.com** **LinkedIn** **GitHub** **Portfolio**

Full-stack engineer who works directly with the people using the software. Took two university systems, one for industrial training and one for minor and major projects, from first requirements conversation to production, serving 450+ students and 40+ faculty, and still own their support, roadmap, and deployment. Comfortable across the stack in TypeScript, from React front ends to Dockerized Node services, and at explaining technical decisions to non-technical stakeholders.

Internship

- **Pandit Deendayal Energy University (PDEU)** Hybrid
  Tech Intern *May 2024 – July 2024*
  - Scoped and built the first version of the university's project submission portal with faculty stakeholders; the work continued past the internship and is detailed below.

Projects

- **Minor and Major/Comprehensive Project Management System** In production
  TypeScript, React, Node.js, Express, Appwrite (self-hosted), LDAP, Docker *May 2024 – Present*
  - Built and run the system PDEU uses to manage minor, major, and comprehensive projects end to end, from team formation through final evaluation.
  - Gathered requirements directly from faculty and administrators, and iterated through regular demos and feedback rounds with both faculty and students.
  - Team and mentor allocation: students form teams and are matched with faculty mentors, with mentor details available throughout.
  - Project submissions, guidelines, and deadlines in one place, with evaluation and grading workflows for faculty.
  - Role-based access for SuperAdmin, faculty, and mentors; sign-in bound to the campus LDAP directory, set up with the university IT department.
  - Migrated the original Next.js build to a React and Node.js stack in a pnpm and Turborepo monorepo, with self-hosted Appwrite for auth, database, and storage; containerized with Docker and deployed on the university's own server.
- **Industrial Training Management System** In production
  TypeScript, React, Node.js, Express, Appwrite (self-hosted), LDAP, Docker *May 2026 – Present*
  - Built and run the system PDEU uses to manage students' industrial training, replacing a manual process with one tracked workflow.
  - Student applications: students submit their training details and supporting documents through the portal instead of by hand.
  - Document uploads handled in the system, so coordinators review everything in one place.
  - Status tracking and reports for coordinators, showing where each student's training stands.
  - Act as first point of contact for students and faculty: triage bug reports and feature requests, and ship the fixes.

Experience

- **Web Development Committee, PDEU** Gandhinagar, India
  Committee Lead *July 2024 – Present*
  - Lead a committee of student developers building production software for the university under faculty mentorship.
  - Teach a weekly Practical Software Engineering session to **60+ students**, covering coding agents and context engineering, learning with AI, and backend architecture, authentication, databases, and infrastructure.
  - Write and publish the session guides at wdc-guides.pages.dev, so the material stays usable after each session.

Skills

- **Languages**: TypeScript, JavaScript, Python, Java
- **Frameworks**: React.js, Next.js, Node.js, Express.js, Astro, Tailwind CSS
- **Data and Auth**: MySQL, Appwrite (self-hosted), LDAP, REST APIs, role-based access control
- **Infrastructure**: Docker, Nginx, PM2, Git, Linux servers, AWS, DigitalOcean
- **Working with Users**: Requirements gathering, stakeholder demos, user support, technical teaching and writing

Education

- **Pandit Deendayal Energy University (PDEU)** Gandhinagar, India
  B.Tech. Computer Science and Engineering; CGPA: 9.44 *July 2023 – Present*
