Mrugesh Thesiya

+91-7567164025 **thesiyamrugesh@gmail.com** **LinkedIn** **GitHub** **Portfolio**

Engineer who builds products by starting with the people who use them. Owned two university systems, industrial training management and minor and major project management, from discovery to launch: ran requirements sessions with faculty, wrote the specs and user flows, set the roadmap, tracked adoption, and shipped the products myself. They replaced manual processes and now serve 450+ students and 40+ faculty.

Internship

- **Pandit Deendayal Energy University (PDEU)** Hybrid
  Tech Intern *May 2024 – July 2024*
  - Scoped and built the first version of the university's project submission portal with faculty stakeholders; continued owning the product after the internship, as detailed below.

Product Experience

- **Minor and Major/Comprehensive Project Management System** In production
  Product Owner and Developer *May 2024 – Present*
  - Own the system PDEU uses to run minor, major, and comprehensive projects end to end, replacing a manual process with one tracked workflow.
  - Ran discovery with faculty and administrators to define the problem and requirements, then wrote specs and user flows before each build.
  - Own the roadmap: collect feature requests and bug reports from students and faculty, prioritize them, and decide what ships next.
  - Defined the core flows: team and mentor allocation, project submissions with guidelines, and evaluation and grading for faculty.
  - Validate releases through demos and feedback rounds with faculty and students, and track usage to judge adoption and find gaps.
  - Coordinated with university IT on campus LDAP sign-in, and built the product too: React and Node.js in TypeScript, self-hosted Appwrite for auth, database, and storage, role-based access, Docker deployment.
- **Industrial Training Management System** In production
  Product Owner and Developer *May 2026 – Present*
  - Own the system PDEU uses to manage students' industrial training, replacing a manual process with one tracked workflow.
  - Defined the student flow: training applications and supporting document uploads, submitted in one place.
  - Defined the coordinator flow: review of submissions, status tracking, and reports on where each student's training stands.
  - Prioritize requests from students and faculty and track usage to see where the workflow still has friction.
  - Ship the product end to end, from specs to deployment, and act as first-line support for users.

Leadership

- **Web Development Committee, PDEU** Gandhinagar, India
  Committee Lead *July 2024 – Present*
  - Lead a committee of student developers building production software for the university under faculty mentorship.
  - Run a weekly Practical Software Engineering session for **60+ students**, on AI coding agents, learning with AI, and backend architecture.
  - Write and publish the session guides at wdc-guides.pages.dev, so the material stays usable after each session.

Skills

- **Product**: User interviews and discovery, requirements and specs, user flows, roadmap prioritization, usage tracking, stakeholder management
- **Communication**: Product demos, technical writing, teaching, working with non-technical stakeholders
- **Technical**: TypeScript, JavaScript, Python, Java, React.js, Next.js, Node.js, Express.js, REST APIs
- **Data and Infrastructure**: MySQL, Appwrite (self-hosted), LDAP, Docker, Nginx, Git, AWS, DigitalOcean

Education

- **Pandit Deendayal Energy University (PDEU)** Gandhinagar, India
  B.Tech. Computer Science and Engineering; CGPA: 9.44 *July 2023 – Present*
