Mrugesh Thesiya

+91-7567164025 **thesiyamrugesh@gmail.com** **LinkedIn** **GitHub** **Portfolio**

Engineer who sits between users and code: runs technical discovery, integrates with existing systems, deploys, and supports what ships. Took two university systems, industrial training management and minor and major project management, from requirements to production on the university's own infrastructure, including LDAP sign-in built with the IT department, serving 450+ students and 40+ faculty. Teach a weekly technical session to 60+ students, so explaining technical systems to a room is routine.

Internship

- **Pandit Deendayal Energy University (PDEU)** Hybrid
  Tech Intern *May 2024 – July 2024*
  - Scoped and built the first version of the university's project submission portal with faculty stakeholders; the work continued past the internship and is detailed below.

Projects

- **Minor and Major/Comprehensive Project Management System** In production
  TypeScript, React, Node.js, Express, Appwrite (self-hosted), LDAP, Docker *May 2024 – Present*
  - Took the system from requirements to production on the university's own servers, replacing a manual process for managing minor, major, and comprehensive projects.
  - Ran technical discovery with faculty and administrators, turned their needs into specs and user flows, and demoed each build to them for feedback.
  - Integrated sign-in with the campus LDAP directory, working with the university IT department on access and configuration.
  - Delivered team and mentor allocation, project submissions with guidelines, and evaluation and grading, with role-based access for admins, faculty, and mentors.
  - Migrated the original Next.js build to a React and Node.js stack in a TypeScript monorepo, with self-hosted Appwrite for auth, database, and storage; containerized with Docker and deployed on university infrastructure.
- **Industrial Training Management System** In production
  TypeScript, React, Node.js, Express, Appwrite (self-hosted), LDAP, Docker *May 2026 – Present*
  - Took the system from requirements to production, replacing a manual process for managing students' industrial training.
  - Built student applications with supporting document uploads, and status tracking and reports for coordinators.
  - Act as first-line technical support: triage issues from students and faculty, reproduce them, and ship fixes.
  - Track usage after each release to catch problems early, and demo changes to faculty before rollout.

Experience

- **Web Development Committee, PDEU** Gandhinagar, India
  Committee Lead *July 2024 – Present*
  - Deliver a weekly Practical Software Engineering session to **60+ students**, explaining coding agents, backend architecture, authentication, databases, and infrastructure to a mixed-skill audience.
  - Write and publish the technical guides for each session at wdc-guides.pages.dev.
  - Lead a committee of student developers building production software for the university under faculty mentorship.

Skills

- **Customer-facing**: Technical discovery, product demos, system integration, technical documentation, user support, stakeholder communication
- **Languages**: TypeScript, JavaScript, Python, Java
- **Frameworks**: React.js, Next.js, Node.js, Express.js, Tailwind CSS
- **Data and Auth**: MySQL, Appwrite (self-hosted), LDAP, REST APIs, role-based access control
- **Infrastructure**: Docker, Nginx, PM2, Git, Linux servers, AWS, DigitalOcean

Education

- **Pandit Deendayal Energy University (PDEU)** Gandhinagar, India
  B.Tech. Computer Science and Engineering; CGPA: 9.44 *July 2023 – Present*
